

Welcome to the lab.

ZYYX Labs AB is a Swedish company that develops, produces, and sells desktop 3D printers for industrial users world-wide.

The printers are designed to be robust, reliable, safe, cost-efficient, and easy-to-use.

zyyxlabs.com

The ZYYX+ is a Desktop 3D printer for the professional user. Its safety, reliability, and ease-of-use makes it the perfect choice for schools, product developers, and architects in need of quick and easy prototypes and concept models.

58 dB

Quiet
The ZYYX printers are designed with a closed chamber, resulting in a quiet and OfficeSafe™ printing environment.

Desktop
The desktop design allows for instant access, high productivity, and true agile development.

Fume free
With HEPA and active carbon filters that remove ultrafine particles and odors from the outflow air, the printers are OfficeSafe™ and fume-free.

Workhorse
The ZYYX printers are reliable and robust, with previous customers referring to them as the office "Workhorse".

Out-of-the-box
The printers are pre-calibrated and ready for use at delivery, all inclusive.

65 °C

ZYYX Pro for Professionals
The hardened SwiftTool™ and 65 °C chamber enable use of Engineering Grade materials to make functional prototypes and high-strength parts.

The ZYYX Pro is an Industrial-Grade 3D printer. It is specifically developed to let professionals rapidly produce customized high-strength parts. Choose between proNylon, proCarbon, and proGlass for your functional prototypes and end-use parts such as tools, jigs, and fixtures.

Features of the ZYYX+

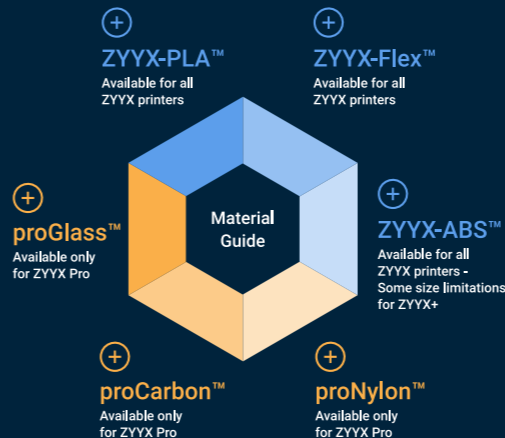

- OfficeSafe™ - Closed design with air filter system
- Automatic Levelling - Auto-calibration of build-plate for each print
- Material Monitor - Auto-pause for material problems
- Robust design
- Simplify3D - The market-leading software is included
- Open-material system - Compatible with all material brands
- Stand-alone - No computer needed during printing

The Materials

The ZYYX user can choose from a line of carefully selected high-quality polymer materials that comes with plug-and-play profiles.

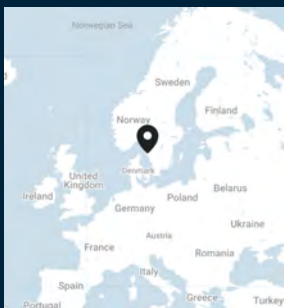

But a ZYYX is also compatible with other material brands - through its open-material system - with all settings available for user tuning.

zyyxlabs.com

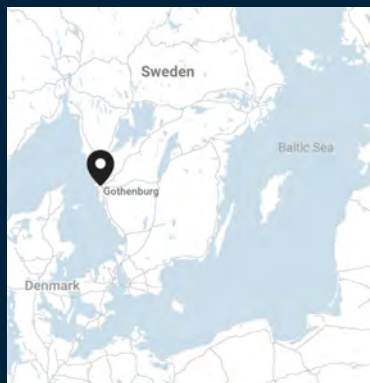

Features of the ZYYX Pro

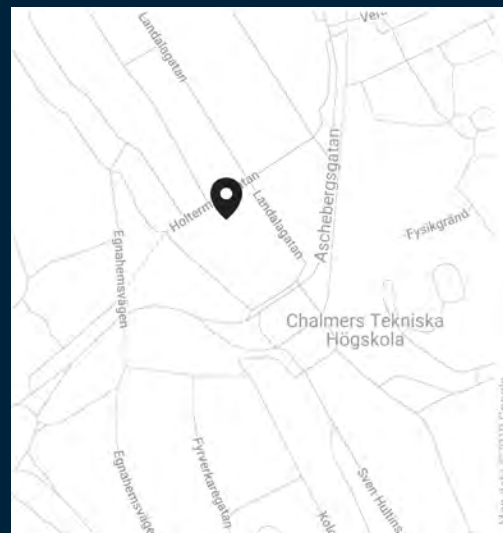

- All as for ZYYX+
- SwiftTool™ - Probably the quickest system for nozzle change on the market
- Heated Chamber - Support for high-strength engineering grade materials
- proProtect™ material system included - Complete system to secure material quality
- All-metal structural design - Even more stability and quality for prints
